Strengthening skin barrier

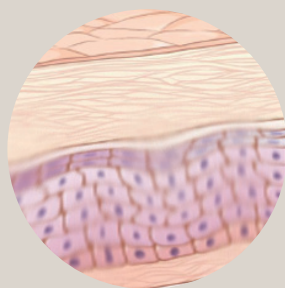

Shiny skin

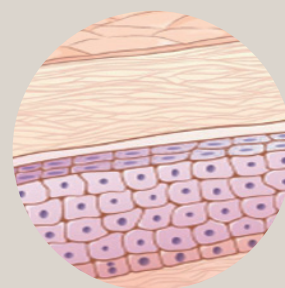

Improves skin elasticity

Revita provides shiny skin

Before

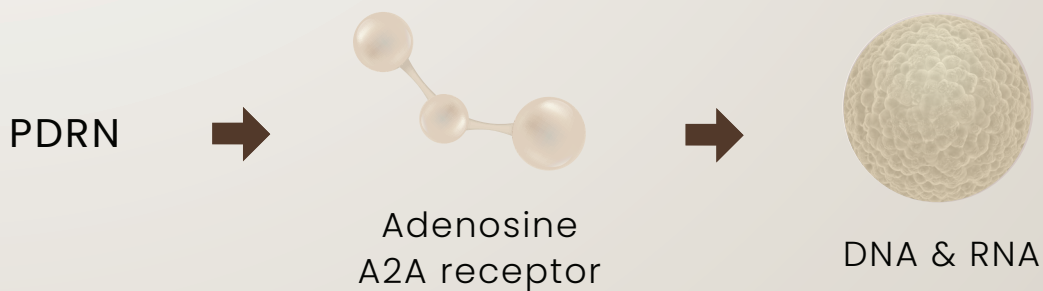

After

Revita which is made of PDRN and Hyaluronic Acid is the most powerful anti-aging solution to immediately supplement the moisture and to improve skin tone and elasticity.

What is PDRN of Revita?

Poly Deoxy Ribo Nucleotide (PDRN) is a DNA obtained by extracting from the sperm of salmonidae fish and regenerative activity material existing within the living body. This acts on tissue formation and cell division as a regenerative ingredient and helps to improve the skin within short-term period.

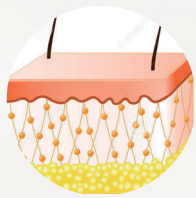

BENEFITS OF PDRN

- 1 Boosting proliferation of multiple growth factors.
- 2 Rapid generation of wounded skin.
- 3 Solving general skin problems with the activation of microcirculation.

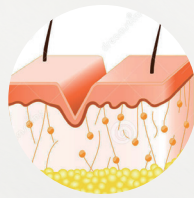

What is HA of Revita?

Hyaluronic Acid (HA) is an ingredient which naturally exists in a human body as a component of cell and substrate. It reduces as we get older and as a result, skin loses the elasticity and has more wrinkles. For the dry and elasticity losing skin, delivering Hyaluronic acid directly to percutaneous layer of skin is the most effective way to feel the immediate effect.

Younger skin

Older skin

Younger skin

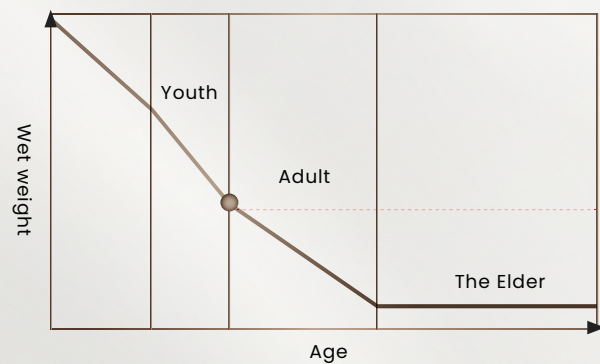

Older skin

BENEFITS OF HYALURONIC ACID

- 1 Recovery of skin elasticity
- 2 Moisture supplying
- 3 Improvement of environment in skin
- 4 Strengthening of skin barrier
- 5 Glowing skin
- 6 Brightening skin tone

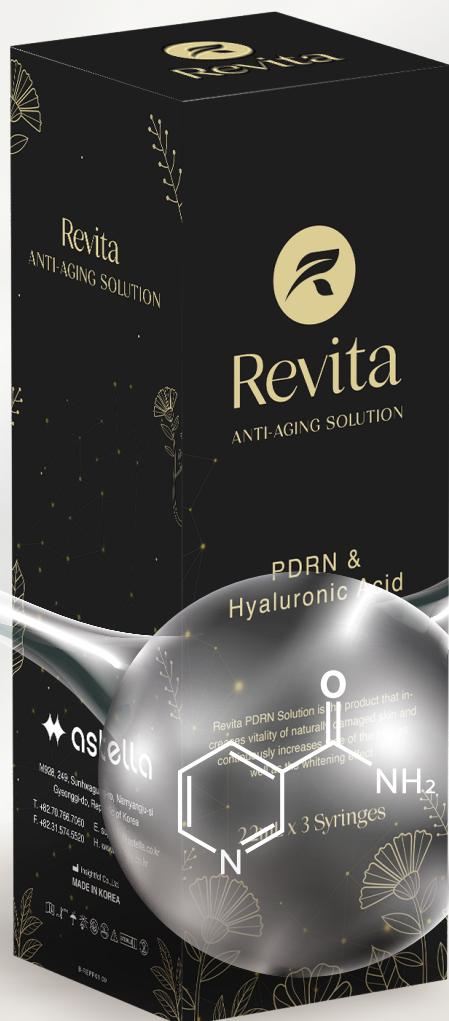

Amount of Hyaluronic Acid within the skin according age

*Reduction of Hyaluronic Acid may lower the vitality of skin to cause xerosis and skin disease.

What is Niacinamide of Revita?

Niacinamide, which is a vitamin B complex and class 0 of physiological activity amide EWG (Environmental Working Group) of niacin improves the moisture controlling functionality of skin itself as a material to activate the lipids which play the most important role in moisturizing control within the skin. It is excellent in skin safety and stability and is involved in the generation of bioenergy to play roles of whitening, moisturizing, and improving skin tone brightly.

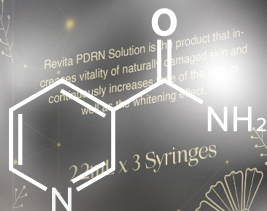

● Anti-Aging Improvement

● Moisturizing

● Whitening

● Troble Improvement

Niacinamide

If you want shiny skin, Revita is the most powerful solution

Most people use cosmetics when they have dry skin. But it is not so effective. So, for the dry and elasticity losing skin, delivering Hyaluronic Acid directly to percutaneous layer of the skin is the most effective way to feel the immediate effect.

If you use a delivery device exclusively for **Revita**, you can expect even better effect.
