METOOO FILL

Delicate and Safety Premium Filler

METOO FILL+

Independent 3D Mesh Crossed-Linked

LIGHT IN METOO FILL+

METOO FILL LIGHT is the smallest particle, Suitable for small wrinkles or thin skin three-dimensional sense and other delicate parts.

DEEP IN METOO FILL+

METOO FILL DEEP is suitable for creating a three-dimensional sense of the middle layer of the skin, relieve wrinkles deep in the skin, Can create a partial fullness of the effect of the line. Apply to the lip, nasolabial folds, wrinkles, forehead wrinkles, drooping mouth and other parts.

VOLUME IN METOO FILL+

Is the largest particle products, METOO FILL VOLUME is to correction the overall face, and create a strong sense of three-dimensional. With the correction of the jaw, improve the nose, the overall effect of facial lines.

METOO FILL + has original 3D cross link technology

METOO FILL + Unstable hyaluronic acid (Figure 1) becomes uniform, A better and more stable structure (Figure 2), Is to enhance the flexibility of the product.

Break through the traditional hyaluronic acid

Through three years of research and development METOO FILL+ is to maximize the advantages of upgrading traditional hyaluronic acid, To form a superior three-dimensional and stamina.

High elasticity and high cohesion make perfect finish design

METOO FILL+ gel factor is small and balanced, Long-term maintenance of shaping effect, Meticulous and delicate surgical effect, Suitable for the performance of the sharp contour, simple and easy to use.

Contains 0.3mg / ml lidocaine to reduce pain

1.0 ml of METOO FILL + contains 0.3 mg / ml lidocaine, surgery to minimize pain, More sensitive to pain can easily treatments.

Impurities are 0.0001% clean and pure hyaluronic acid filler.design

KFDA certified range hyaluronic acid impurities and toxins content of 2%, METOO FILL + content of close to 0 is a very safe high-purity hyaluronic acid.

METOO FILL+

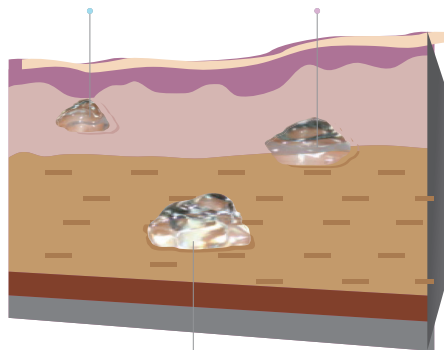

Optimized Injection Sensation

METOO FILL+ each product surgery site

METOO FILL

Delicate and Meticulous
Hyaluronic Acid Filler

- ✓ Raw material safety by dedicated management system
- ✓ To prevent the passage of time and edema, the production of high-purity HA content
- ✓ Has the advantage of high viscoelasticity
- ✓ Complete fine uniform particle technology
- ✓ No residual chemical catalyst material was detected by the complete cross-linking process
- ✓ Aseptic manufacturing environment to prevent side effects
- ✓ Less than 0.1MIU/mL Endotoxin
- ✓ To minimize the same pH value and osmotic pressure of the body pain
- ✓ The most suitable precision injection pressure surgery
